

## Controller Product Announcement 500-16-002

**To** : All Distributors  
**From** : Commercial HVAC Team - MESCA  
**Date** : April 07<sup>th</sup>, 2016  
**Subject** : AE-200A, AE-50A and EW-50A Controllers Release

---

MESCA is pleased to announce the release of new AE-200A, AE-50A and EW-50A central controllers.

### AE-200A/50A

### EW-50A

AE-200A/50A and EW-50A come with in-built BACnet function via pin code. It doesn't need an additional BAC-HD150 interface for BACnet function like in case of AG-150A.

- EW-50A replaces EB-50GU-A as a standalone controller after the current stock gets depleted.
- EW-50A can be used both as a standalone and expansion controller.
- AE-50A can only be used as an expansion controller with AE-200A.
- AG-150A and PAC-YG50ECA (Expansion Controller) shall be discontinued after the current stock gets depleted.

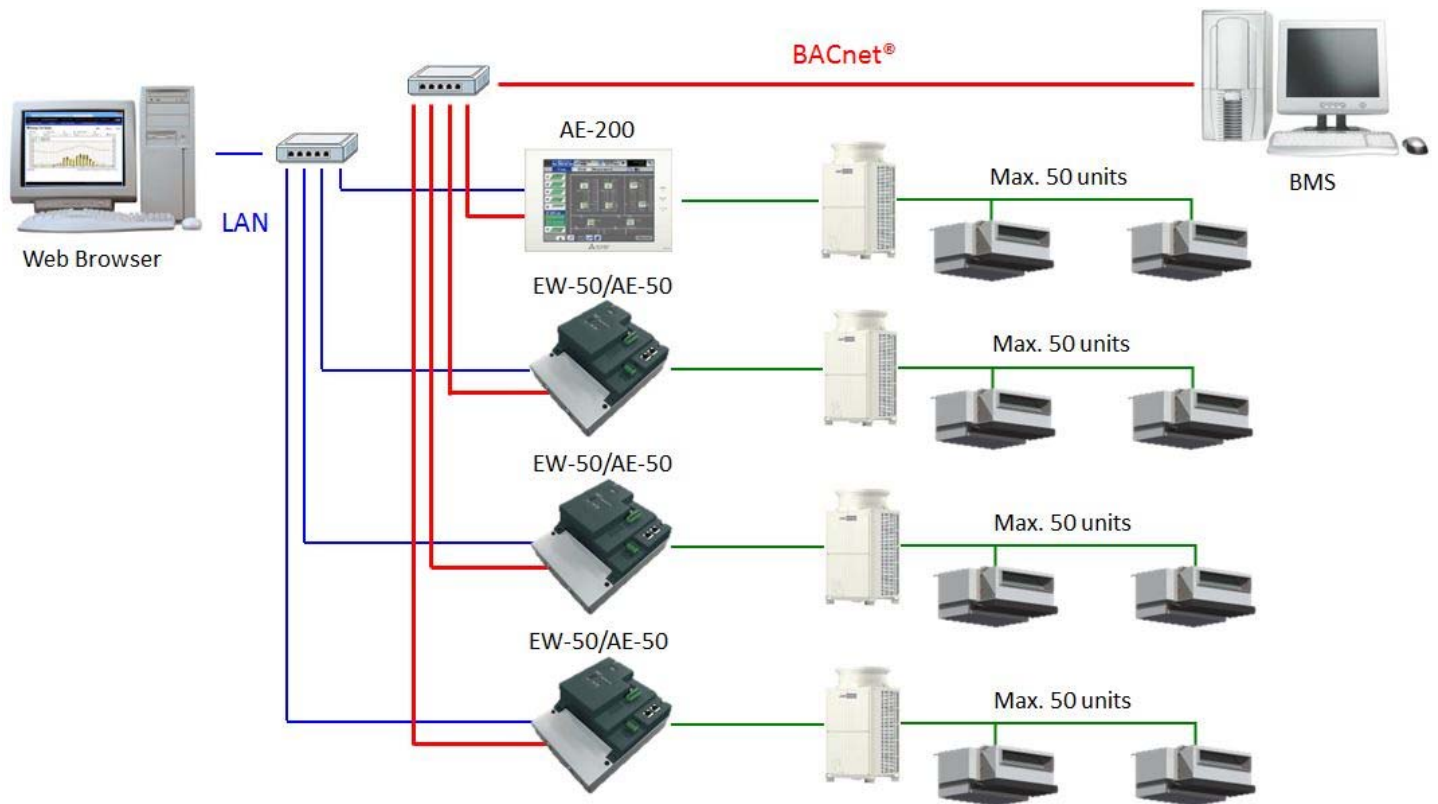

The following \*optional functions are available with these controllers:

- BACnet Function
- Proportion Charge Function
- Personal Web Function
- PLC General Equipment Function

Note: Pin codes must be purchased separately for AE-200 and AE-50/EW-50 expansion modules in any configuration. Please refer to the pin registration forms of AE-200A/50A and EW-50A for more information on buying these \*optional functions.

The following software programs are required during commissioning of AE-200A/50A and EW-50A:

- AE-200 Initial Setting Tool → For initial setting
- AE-200 SetBACnet\_v3000 → For BACnet function; also requires minimum ver. 7.31
- AE-200 Charge Calculation Tool → For proportion charge function

**Pic: For reference only**

Submittals, manuals and software programs shall be available on MESCA website once available from the Factory.
