Pipe length: 25 ft. (7.6 m), 2. Nominal heating condition	s (26.7°CD.B./19.4°CW.B.), Outdoor: 95°FD Level difference: 0 ft. (0 m)	.B. (35°CD.B.)				
Pipe length: 25 ft. (7.6 m), 3. Be sure to install a valve or		tic air vent.				

4. Install a strainer (40 mesh or more) on the pipe next to the valve to remove the foreign matters.

5. Ventilation air to be introduced independent of or in series with HVRF indoor units. Please refer to local codes for the required ventilation rates specific to the application.

6. All components of the system must be compatible.

7. Applications should be restricted to comfort heating and cooling only; process/equipment heating and cooling applications are not recommended.

8. Mitsubishi Electric Sales Canada Inc. (MESCA) supports the use of only MESCA supplied and approved components and accessories for proper functioning of the unit(s).

9. Should any person change this document in any manner whatsoever without MESCA's written permission, the document shall be of no force and effect and any change

shall be deemed to be a representation and warranty made by that person and not MESCA. That person, and not MESCA, shall assume full responsibility for the consequences of such changes. MESCA assumes no

responsibility for any consequences in such cases.
